

Advanced Software Engineering – Task 4

Abstract: This document is used to collect all assumptions/considerations used to develop the necessary artifacts of this task and also acts as the result report.

Assumptions and considerations are used in the following as synonymous, meaning an own interpretation of the actual situation has been applied

Implementation Status “Integration of Model to HTML Transformation”

The model from task 2 has been used as is, no further modification has been done. This also includes all OCLs, in standalone usage, the necessary delegates are configured.

The transformation to Text uses the task 3 results, basic serialization of the model helps to understand the changes performed by the UI.

Implementation Status “Integration of Model to Model Transformation”

This part is not implemented due to time-constraints.
